

## Don't forget...

SKC offers regularly held ONE day practical training courses in air monitoring.

The course is suitable for beginners through to those wanting a refresher. It can be tailored and run in-house and is a mixture of theory and practical sessions.

The course includes:

- Introduction to air sampling methods
- Exposure limits – what they are and how to monitor for them
- Dust/gas/vapour sampling - how, when and why – the recognised methods
- Practical sampling exercises with equipment.

**For dates and more information, please contact SKC.**

# Flite 3

Portable, versatile and fully programmable pump for high volume air sampling. SKC's highly versatile Flite 3 air sample pump provides portable high performance sampling for dusts, aerosols, fibres and microbes. Flite 3 is ideal for static asbestos sampling.

*Any building constructed pre 2000 could contain asbestos.*

*When asbestos is disturbed the fibres can be inhaled into the lungs and can cause asbestosis, lung cancer and a particularly aggressive cancer called Mesothelioma.*

*These diseases cause 4000 deaths a year. Static sampling is necessary when going through the asbestos removing process and when assessing a site for reoccupation.*

The SKC Flite 3 is suitable for a range of applications including:

- Asbestos monitoring
- Area and environmental monitoring
- Biosampling
- Long-term background monitoring

**For further information please contact SKC on 01258 480188  
or email enquiries@skcltd.com**

## Features Include:

- Fully portable with light weight battery option
- Wide flow range – 2 L/min to 20 L/min to free air
- Fully programmable, can be set to manual, timed, delayed or intermittent sampling
- Long run times, up to 24 hours depending on the filter and flow rate
- High performance sampling capabilities
- Battery, 2 models available, suitable for either longer run times or light weight operation
- Steel casing to withstand daily rigours and a sturdy handle for easy portability
- Optional sampling mast – lightweight, screw-in 2 piece aluminium alloy tube
- Ensures minimum 1 metre sampling height with the cowed asbestos head
- Front mounted power socket to provide easy access if mains operated

## Pumps and Kits:

- Flite 3 Pump battery not included **901-3011**
- Flite 3 Pump Kit with lightweight battery and charger **901-3011-3K**
- Flite 3 Pump Kit with long run time battery and charger **901-3011-7K**

## Power Options:

- 3.2 Ah, light weight battery **P901201**
- 7 Ah, longer run times battery **P901202**
- Battery Charger **901-210**
- Mains Adaptor (UK/EU/US/AUS mains plug) **901-211**
- Mains Adaptor (UK/EU/US/AUS mains plug)

## Accessories:

- Aluminium Sampling Mast **901-213**
- Asbestos Sampling Head **225-54A**
- MCE Gridded Filters **225-1913**
- 25 mm 0.8 µm (Pk/100) **714C**
- Acetone Vaporiser

## Calibration:

- Rotameter **393-2260**
- 2.0 L/min to 26 L/min
- Calidaptor **391-05**
- For asbestos sample heads
