chek-mate

The
easy-to-use
calibrator
from SKC Ltd.

SKC

Key features

- Less than 10 minutes to stabilise to ambient temperature - Operating temperature range: 0°C to +40°C (32°F to 104°F)
- 0.5 L/min to 5 L/min flow range
- Volumetric Accuracy 1% of reading
- Precision: 0.001 L/min
- Displays continuous real-time volumetric flow rate readings in L/min
- Approximately 30 hours battery life - 1 9V PP3 disposable battery
- Operating barometric pressure range: 810mbar to 1090mbar (23.9"Hg to 32.2"Hg)

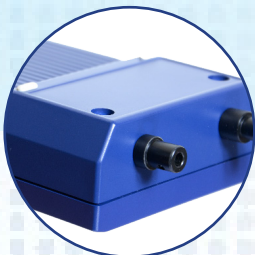

Part number: 375-0550

Simple to use one button operation

No Moving Parts

Compact field portable design

Use in any orientation

SKC

Working Principle

Orifice type flow meter - the flow meter incorporates sensors to measure the pressure drop across an orifice and automatically corrects for changes in the air temperature and barometric pressure to provide the indicated volumetric flow rate reading.
